# Spring Reforestation Event 2022

Fruit Trees	To ensure fruit production once the apple trees reach fruit-bearing age, choose more than one variety of apple tree, including crabapple tree varieties with white blossoms for cross-pollination. Cherry trees also require cross-pollination with a different, compatible variety (the two varieties offered by GCD are compatible). The pear tree variety offered is self-pollinating but will likely produce more fruit if more than one compatible pear variety is planted.					Qty 1	Quantity	Price
		\$24		\$				
Apple, Aztec Fuji (5-7' tree, 5/8" diameter)		\$24		\$				
Apple, Royal Red Honeycrisp (5-7' tree, 3/4" diameter)		\$24		\$
